Total returns are calculated using the sell (exit) price, net of management fees and gross of tax as if distributions of income have been reinvested at the actual distribution reinvestment price. The actual returns received by an investor will depend on the timing, buy and exit prices of individual transactions. Return of capital and the performance of your investment in the fund are not guaranteed. Past performance is not a reliable indicator of future performance. Figures showing a period of less than one year have not been adjusted to show an annual total return. Figures for periods of greater than one year are on a per annum compound basis. The current benchmark may not have been the benchmark over all periods shown in the above chart and tables. The calculation of the benchmark performance links the performance of previous benchmarks and the current benchmark over the relevant time periods.

## Why invest ethically?

Portfolio diversification: Diversify your portfolio by investing in companies and sectors not well covered by other fund managers and brokers. Help build a better world: Invest in the new, lowcarbon economy, fund medical and technology breakthroughs, efficient transport and more. Promote human rights: We strive to avoid any investment in companies involved in the poor treatment of asylum seekers or the exploitation of workers through poor working conditions.

## Commentary

The S&P/ASX 300 returned 0.5% over the quarter despite ongoing uncertainty as pent-up demand, ongoing impacts from COVID-19, and the conflict in Ukraine continues to put pressure on inflation. In the US YoY CPI rose to 9.1% in August. In Australia June CPI rose to 6.1% YoY, the highest annual change in over 30 years. The global economy faces a bleak outlook, with Europe facing a looming energy crisis, many Central Banks rapidly raising rates to tackle inflation, while in China the People's Bank of China has been loosening policy as its economy slows to its lowest rate of growth in decades, driven by an ongoing property crisis and continued lockdowns as part of its zero-COVID policy.

The Emerging Companies Fund appreciated 1.7% (1.8% Wholesale) outperforming its benchmark which fell 1% over the September Quarter. The outperformance is attributed to the Funds significant overweight allocation into the healthcare with cognition company Cogstate appreciating 42% on news its shareholder and business partner Japanese company Eisai had reported positive clinical data in a Phase 3 Alzheimer's clinical study. We were pleased with the performance of mortgage insurer Genworth which appreciated 18% while paying a healthy dividend on reporting a strong 2022 result. Our investment in technology company Praemium appreciated 55% on news of the sale of its UK division and a solid 2022 financial result. Other good contributors included non-bank lender Pepper Money which appreciated 18% from an oversold position and PDF productivity and e-signature business Nitro Software +20% on news private equity was building a position.
