Australian Ethical International Shares Fund (Wholesale)

Fund Profile - 30 September 2023

Australian Ethical is one of Australia's leading ethical fund managers. By investing responsibly in well-managed ethical companies, we deliver competitive financial performance to our clients and positive change to society and the environment. Since our inception in 1986, our Ethical Charter has guided all investment decisions and underpinned our business practices. Every year 10 per cent of our profits* are distributed to charitable organisations and social impact initiatives through The Australian Ethical Foundation.

Investment objective

To provide long-term growth through investment in international companies which meet the Australian Ethical Charter.

Total returns are calculated using the sell (exit) price, net of management fees and gross of tax as if distributions of income have been reinvested at the actual distribution reinvestment price. The actual returns received by an investor will depend on the timing, buy and exit prices of individual transactions. Return of capital and the performance of your investment in the fund are not guaranteed. Past performance is not a reliable indicator of future performance. Figures showing a period of less than one year have not been adjusted to show an annual total return. Figures for periods of greater than one year are on a per annum compound basis. The current benchmark may not have been the benchmark over all periods shown in the above chart and tables. The calculation of the benchmark performance links the performance of previous benchmarks and the current benchmark over the relevant time periods.

Why invest ethically?

Portfolio diversification: Diversify your portfolio by investing in companies and sectors not well covered by other fund managers and brokers. Help build a better world: Invest in the new, low-carbon economy, fund medical and technology breakthroughs, efficient transport and more. Promote human rights: We strive to avoid any investment in companies involved in the poor treatment of asylum seekers or the exploitation of workers through poor working conditions.

International Shares	99.5%
Cash	0.5%

Commentary

Both equity and bond markets fell over the quarter. Underpinning these declines was a move higher in the yield curve, with the US 10-year government bond yield increasing 76bps, exceeding 15 year highs. With inflation remaining stubbornly above the Feds target of 2-3%, unemployment still below 4% and the oil price on the rise again, markets are repositioning for rates to remain relatively high compared to recent history over the longer term.

The International Shares Fund performed marginally behind the MSCI World ex Australia benchmark, with the Wholesale option declining 0.5% over the September quarter, compared to the benchmark of -0.4%. The Retail Trust declined 0.6% over the September quarter.

At a sector level, Technology was the strongest contributor in the September quarter, which is a consistent trend seen this calendar year. Notably, the International Share Fund owns 6 of the "Magnificent 7", which have been the main driver for the sharemarket gains this calendar year. The 6 that we own are: Apple, Alphabet, Meta, Microsoft, Nvidia and Tesla. The one we don't own is Amazon, due to our Ethical screen.

The main sector detractor was the Energy sector. The Fund does not own have any exposure to Energy stocks, which is 4.8% of the benchmark index. This is due to our Ethical screen. We led divestment from the unconventional gas sector in 2011, and in 2015 we made the decision to exit our remaining limited exposure to conventional gas sector companies.
