Australian Ethical is one of Australia’s leading ethical fund managers. By investing responsibly in well-managed ethical companies, we deliver competitive financial performance to our clients and positive change to society and the environment. Since our inception in 1986, our Ethical Charter has guided all investment decisions and underpinned our business practices. Every year 10 per cent of our profits* are distributed to charitable organisations and social impact initiatives through The Australian Ethical Foundation.

**Investment objective**
To provide long-term growth by investing in small capitalisation companies that meet the Australian Ethical Charter.

**Investment strategy**
The opportunity to invest in a diversified portfolio of shares in small capitalisation companies on the basis of their social, environmental and financial credentials. The Fund utilises an active stock-picking management style with stocks selected for growth rather than income. All stocks are chosen on the basis of relative value where we deem the risks are being adequately priced.

Total returns are calculated using the sell (exit) price, net of management fees and gross of tax as if distributions of income have been reinvested at the actual distribution reinvestment price. The actual returns received by an investor will depend on the timing, buy and exit prices of individual transactions. Return of capital and the performance of your investment in the fund are not guaranteed. Past performance is not a reliable indicator of future performance. Figures showing a period of less than one year have not been adjusted to show an annual total return. Figures for periods of greater than one year are on a per annum compound basis. The current benchmark may not have been the benchmark over all periods shown in the above chart and tables. The calculation of the benchmark performance links the performance of previous benchmarks and the current benchmark over the relevant time periods.

Why invest ethically?

Portfolio diversification: Diversify your portfolio by investing in companies and sectors not well covered by other fund managers and brokers.

Help build a better world: Invest in the new, low-carbon economy, fund medical and technology breakthroughs, efficient transport and more.

Promote human rights: We strive to avoid any investment in companies involved in the poor treatment of asylum seekers or the exploitation of workers through poor working conditions.

Commentary

The Emerging Companies Fund returned 10.5% (10.8% Wholesale fund) for the March quarter, underperforming the benchmark (12.7%) and returning some of its excess performance from the December 2018 quarter.

The investor fear we saw in late 2018 eased with share market confidence returning on expectations of China and the US resolving their trade dispute and lower global interest rates.

At the sector level, consumer discretionary and healthcare took a dip in investment performance. Some of the underperformance is explained by high multiple companies not held by the fund benefiting from strong share market momentum in the quarter.

The Fund’s strongest performer was enterprise software company BigTinCan which continues to grow its software-as-a-service revenues. We’re also starting to see sales enablement emerging as a distinct category of content management software.

Also performing well is Rhipe, which resells predominately Microsoft cloud software and is benefiting from the growth of Office365 and Microsoft Azure.

The third strongest performer was aerial mapping software company Nearmap, which appreciated strongly after announcing impressive sales figures in the first half. Bravura Solutions reported a strong 2019 first half result while providing guidance for an improved full year result.
