AUGUST 2019

Scope of Register

In accordance with the **Conflicts Management Policy**, this **Register of Relevant Duties** captures all duties owed by AEI, AES or AEF, or a Responsible Person of AEI, AES or AEF, to members, investors and/or shareholders of the Group, or to any other person (including organisations), that the Group has determined to be relevant because it might reasonably have the potential to have a significant impact on the Group or the Responsible Person's ability to act in the best interests of members, investors and/or shareholders.

The Register below captures current relevant duties in respect of:

Description of the Conflict

An 'actual conflict' is a conflict which exists. A 'potential conflict' is a conflict which has the potential to arise in certain circumstances. A 'perceived conflict' is a situation where a third party, who may not be privy to all relevant information in relation to the situation at hand, may perceive that a conflict exists.

The determinations made in Column 3 of the Register have been made with reference to these definitions.

Materiality of the conflict

The **Conflicts Management Framework** (section 5.3) defines a 'conflict of relevant duty' as any situation that might reasonably be considered to have the potential to have a material impact on the capacity of the Group, or a Responsible Person or employee of the Group, to act in a manner that is consistent with the best interests of members, investors and shareholders.

The **Register of Relevant Duties** captures all conflicts of relevant duty which have been identified, and rates each conflict as "material" or "not material" (Column 5 of the Register) based on the Board's opinion of the capacity

of the conflict of relevant duty to impact the ability of the Group, or a Responsible Person or employee of the Group, to act in a manner that is consistent with the best interests of members, investors and shareholders.
