Calculating Returns
- Net investment returns are calculated using exit prices.
- Net investment returns have been calculated using prescribed standard methods and assumptions, and take into account administration and investment fees, taxes and other costs.
- The standard calculations are based on a member with an account balance of $50,000, which will not be relevant to all members.
- The standard calculations do not allow, for example, for the effect of contributions to an account, insurance fees from an account or various other matters.

Past performance is not an indicator of future performance. Performance is not guaranteed.
While ethical investing is our bread and butter, we know there are a lot of projects and organisations doing good that aren’t traded on investment exchanges. These projects have a vital role to play in achieving a happy, healthy world, so each year we donate 10% of our pre-tax profits to organisations making a positive difference.

Since our community grants program began in 2000, we have donated over $2 million to charitable organisations. In FY16, we received a total of 739 grant applications. These applications were reviewed internally for their ability to deliver tangible outcomes that benefit the planet, people or animals. All our major stakeholder groups have a say in who receives a grant, employees and shareholders voting on the winner from a shortlist. This was the first year where even our clients had an opportunity to participate. In FY16, we distributed $230,000 of community grants to 18 organisations through the Australian Ethical Foundation. The Foundation was granted charity registration with the Australian Charities and Not-for-profits Commission on 12 August 2015.

FY16 community grant recipients

$20,000 grant recipients

The Humanitarian Group
Providing legal assistance for people seeking asylum in WA

RSPCA QLD
Installation of a solar system at the Brisbane Animal Care Campus
https://www.rspcaqld.org.au/locations/brisbane

Centre for Compassionate Conservation
Prevention of localised extinctions of wombats through early mange treatment
goo.gl/168DSY
The Northern Territory’s environmental and planning legislation has repeatedly failed to adequately protect the NT’s pristine and world-renowned environment. In October 2014, the NT established the NT Civil and Administrative Tribunal to pave the way for ordinary Territorians to challenge government decisions. The NT Environmental Defenders Office is conducting a law reform and advocacy project focusing on any changes needed to allow the Tribunal to hear challenges under environmental, mining, petroleum, and planning laws. Australian Ethical’s $20,000 grant will help to provide community education – including in remote indigenous communities – about how the Tribunal can improve access to environmental justice.

www.edont.org.au

Animalia Wildlife Shelter provides emergency and short and long term care for injured, sick and orphaned Australian wildlife, releasing them back into the wild once rehabilitated. In a truly admirable goal, the centre has decided it’s not only desirable but absolutely necessary for them to switch to renewable energy, and effectively take their organisation off-the-grid. Water and energy is currently costing Animalia Wildlife Shelter around $10,000 per year due to the amount of heat pads, heat lamps, and the constant need of electricity and water to provide care for the wildlife needing rehabilitation. Our $20,000 grant will allow the shelter to build a solar system, meaning they can put other monies fundraised solely into the care, feeding and rehabilitation of Australian native wildlife.

www.animaliawildlife.org.au

Community grants to the value of $300,000 were awarded to 18 charities and social businesses working on Australian and international causes this month. The projects are varied, and include animal welfare, conservation, women’s empowerment, renewable energy, addressing homelessness and alleviating poverty.

Phil Vernon, Australian Ethical’s managing director said, “Our company Charter isn’t simply a guide for screening investments – it is the basis of our company culture. Underpinning it is a belief that we have a responsibility to do more than just make money, but to improve the world around us. The grants program is one way we are achieving this goal”.

“Whether it’s supporting Indigenous health in the outback, caring for donkeys in Afghanistan, or creating jobs for refugees – there are so many inspiring people working hard to make a difference. We are proud to support these organisations and the great work they are doing,” said Mr Vernon.

Australian Ethical’s Community Grant Recipients 2015:

- The Orangutan Foundation
  Reforestation of the Orangutan Legacy Forest in Indonesia
  http://orangutanfoundation.org.au/

- Wildlife Asia
  Deploying a Sumatran rhino protection team in Sumatra

- Black Cockatoo

Unleashing the power of tech: Investing in information

Mason Willoughby-Thomas, Portfolio Manager at Australian Ethical, explains how we sort the signal from the noise.

Information Technology (IT) has been a successful hunting ground for Australian Ethical for many years. In today’s society, the IT sector is one of the fastest moving and most dynamic segments of not only our investment universe, but the overall economy.

Our investments cover a broad range of areas such as IT outsourcing providers, IT consultants, hardware vendors, data centre operators, software developers and telecommunications companies. Many of the companies we invest in offer products, services or solutions that provide their customers with meaningful improvements in operating efficiency, productivity and waste reduction. We look for companies that provide new ways for their customers to access improved products and services at a competitive cost. The constantly growing IT sector is an attractive investment opportunity that fits well within the principles of our Charter – for example, through improving efficiencies and contributing to human education.

Keeping up with constant flux

It’s no secret that technological obsolescence and disruptive forces pose a constant threat to most IT companies. These unruly forces can be highly destructive to conventional operating models and can rapidly degrade a company’s competitive position. A prime example has been ‘cloud’ computing. Facilitated by the rapid evolution of high-speed data networks, cloud computing has become a real player against traditional computing networks. This has fostered a progressive shift away from capital intensive on-site IT infrastructure models with high upfront costs. It’s now all about ‘consumption’ based IT models that only charge the customer for what they actually use, managed using outsourced infrastructure and remotely hosted software. This development has had a highly disruptive effect on traditional IT services providers that tend to just focus on servicing customers’ in-house IT. These international IT service providers benefit from a new layer of competitiveness as greater global interconnectivity is supported by increasingly ubiquitous high-speed data networks. In essence, there’s been a very rapid commoditisation of traditional IT services – and we aim to position our IT investments where we can gain from a positive change for society.

While a number of companies have suffered what we in the business call ‘value erosion’ as new entrants and new technologies have displaced old business models, there’s also a big opportunity for the astute investor. Companies such as Perth-based ASG, who we’ve invested in, have taken advantage of the sudden shift towards cloud-based IT models and have quickly reinvented themselves as providers of ‘new world’ services. ASG has a strong base of multi-year contracted customers, which has given them stable earnings and cash flow to support the heavy investment needed to transform their business. We recognise that a key differentiator between the stronger and weaker performers in the IT sector is having contracted, recurring revenue streams – so this is another important key investment characteristic we target. We’ve also invested in IT services companies such as UXC and Oakton who are market-leaders in new technologies and service capabilities.

Disruption with purpose

The IT-disruption story is certainly influenced most by companies that benefit from change, or are themselves the source of the disruption. These kinds of companies often exhibit unique capabilities or technologies that are difficult to replicate, are market-leaders in their particular field, operate globally, face limited competition, or provide products or services that are ‘mission critical’ for their clients. A prime example is construction collaboration software provider Aconex. Aconex provides a centralised platform for many of the world’s largest construction contractors and asset owners to collaborate. The technology solution is a clear market leader, the addressable market exceeds US$6bn with only modest saturation to date, the software is considered mission-critical, and the competition is modest at best.

Language services company Appen is another highly successful investment for Australian Ethical. It’s a company that is benefiting from the rise of the online world and its disruptive influence. Appen is an Australian owned and based company that provides access to a global army of linguistics specialists that help tune computer algorithms that sit behind prominent internet search engines, social media platforms, and eCommerce websites. Appen also provides specialist language services for speech recognition – work that is ever expanding with the popularity of software like Apple’s Siri and Microsoft’s Cortana.
Indemnity insurance

The Trustee is covered by indemnity insurance to protect it from losses arising from claims against it. The insurance has been provided by QBE Insurance (Australia) Ltd throughout the 2015–16 financial year.

Investment managers

The Trustee uses Australian Ethical Investment Ltd as its investment manager. More than 5% of the Fund’s assets were invested in Australian Ethical’s funds during the year.

Derivatives

The Australian Ethical Retail Superannuation Fund does not directly use derivatives. It invests in collective investment funds managed by Australian Ethical Investment Ltd, which may use derivatives to reduce the impact of large adverse movements in currency exchange rates (foreign currency hedging). The collective investment funds may also use derivatives to manage interest rate and duration risk in fixed interest and property portfolios.

Complaints resolution

If you have any inquiries or complaints you should address them in the first instance to the Trustee on 1300 134 337 or by writing to the Complaints Officer at the address on the back cover.

If you are dissatisfied with a decision of the Trustee relating to you as a member, you may be able to lodge a complaint about the decision with the Superannuation Complaints Tribunal. The tribunal’s role is to act as conciliator on such matters and, where appropriate, make determinations (including determinations overturning decisions by trustees).

The Superannuation Complaints Tribunal may be contacted on 1300 884 114.

Allotment of earnings

Australian Ethical Retail Superannuation Fund uses unit prices for its investment options. Once a week a unit price is struck for each investment option and members’ funds are updated in line with the movement in their investment option unit price. Movements in unit price reflect movements in the value of an investment option’s assets as well as amounts payable by the investment option for fees and expenses.

The Trustee

The Trustee of The Australian Ethical Retail Superannuation Fund is Australian Ethical Superannuation Pty Ltd. The role of the Trustee is to operate the Fund in accordance with its Trust Deed and relevant law. The Fund is regulated by various pieces of legislation including the Superannuation Industry (Supervision) Act 1993 (SIS) and the Corporations Act 2001.

The Australian Ethical Retail Superannuation Fund is managed by a board of five Directors. All Trustee Board Directors undertake ongoing education and training relevant to their duties. Details about each Director can be found on the Australian Ethical website.

Directors receive a Director’s fee and reimbursement for their expenses. Remuneration details for Directors and Senior Management are disclosed on the Australian Ethical website.

Advisors to the Trustee

The Trustee has appointed the following specialist independent organisations to assist with the key operations of the Fund.

- Administration - Link Market Services Limited
- Custodian - National Australia Bank Limited
- Investment Adviser - Australian Ethical Investment Ltd
- Group Life Insurer - MetLife Insurance Limited
- External Auditor - KPMG
- Internal Auditor - Deloitte
