### Our Ethical Approach

Australian Ethical is a specialist ethical fund manager. By investing responsibly in well-managed ethical companies, we believe we can deliver competitive financial performance to our clients and positive change to society and the environment.

## Why invest ethically?

### Aligning values with investments

You probably already understand the importance of having a portfolio that matches your appetite for risk, but equally, if not more important, is holding a portfolio that reflects your values. For example, if you value the provision of fair working conditions (and no child labour) then it's important to invest in funds that negatively screen out stocks on this basis.

### Portfolio diversification

Ethical funds in particular, often invest in stocks that are not covered by many fund managers and brokers.

### Good for the world

Your investments can help build a new low-carbon economy, fund medical and technology breakthroughs, efficient transport and more.
